#### WORLD'S-1904-FAIR.

THE NEWPORT DISEASE.

Mrs. Stuyvesant Fish is a leader of the so-called "Four Hundred." It is unfair to regard her lightly or to permit the personality of a refined woman to ful. She is cultured, and she is frank.

that as a sample of the characteristic American "high life." She declares that most of the reports concerning the doings of Harry Lehr are false. "All such stories," she says, "tend to make the lower classes hate the rich, and it will have the effect of forming a socialistic or anarchistic class that may do great harm to the country." That is true. But the fault is not altogether with the newspapers, not even with the yellow journals. There is a reason which gives rise to the stories, whether or not they be true. It is that most of the principals in these Newport doings are literally of no practical use on earth.

They pass their time in amusements, innocent enough perhaps, but often silly. It is their right to be amused, and one cannot always be acting the part of wisdom; but it is another thing to make a business of it. If Newport leaders do take an interest in the problems of the day-as Mrs. Fish shows herself to be doing-if they have higher aims at heart, if they do attempt to use a part of their wealth philanthropically, they conceal these virtues. Because they appear before the world devoting all their time to trifling things, they get credit for vapidity.

Very few thinking men, rich or poor, will uphold equality between men save in theory. Mrs. Roosevelt in \$300 a year gowns, and looking it, may be immeasurably superior to anybody in Newport. The trouble lies in the fact that the chief characteristic of the aristocracy of which Mrs. Fish speaks is idleness. Newport has the right to be exclusive, but not the right to be idle. All men and women are privileged to associate with whom they please. That is a part of freedom. But public opinion decrees that every individual shall render his due to ociety at large-shall share the burden of progress

Mrs. Fish herself suggests the remedy which would relieve Newport from the obloquy-the word is fairly used-under which it rests. She says, naively, that Newport is often "stupid"; and that she is interested in the larger world, in public affairs, and wishes there were a field for women in politics. It would be an antidote for stupidness If women, and men, too, of her position were to give a portion of their abilities and energies-better that than money-to some work of consequence, their critics would be disarmed. Honore Palmer of Chicago is a gratifying example.

However, if Mrs. Fish would but visit more fre quently and deliver a little curtain lecture, St. Louis would enjoy the experience immensely. It were better, though, if she had not perpetrated the acid remark concerning Mrs. Roosevelt, which savors too much of the "Newport disease."

### ONENESS OF MIND.

What with the World's Fair, peace conferences, commercial travelers' reunions, bar associations, plumbers' meetings, lady cracker packers' excursions, medical conventions, synods, conclaves and the hundreds of other and various convenings and assemblings next year St. Louis should present a most interesting aspect of agglomerated heterogene-

The what may in this instance, though not correctly by technical interpretation, be called the heteropsychological aspect of St. Louis in 1904 is nothing short of inspiring to contemplate. And this endless and bewildering variety of mind will become oneness of mind by the process of contact and communion, modulation and harmonization. All minds, the doctor's and drummer's and packer's and plumber's, coming together as heterogeneous, will become homogeneous by association and common experisuce-they will be as much alike as pears or leaden

Mind will be animated by a few simple and powformed, men's faces will take on like expressions. Purposes, motives and pursuits mold the face. Sim- also the soil thereof. llarly as we have the "bicycle face" and the "automobile face," we shall have the World's Fair face.

Furthermore, it has been an expense to the municipality, as repairs are money enough to buy new headgear. often necessary, and the taxpayers of the whole city should not be compelled to pay for this work, when a new, modern-type pavement would be durable.

Many wealthy persons and owners of property along the boulevard have remonstrated against the proposed improvement, much to the regret of the administration and the citizens in general; in fact, opposition was hardly expected along this road, as it is the most direct avenue to the World's Fair and the most popular driveway in the city. Probably the | because the latter represents too much. Mr. Hanna chief reason for remonstrance is that residents may not desire that their boulevard be largely frequented. As far as known, a majority of the representative citizens on West Pine boulevard advocated that improvement against obstacles. Lindell boulevard should be improved and made a good Jett in Kentucky.

The other bill which Mr. McAuliffe's committee will soon act upon is at least as important as that partment. An Irishman is at the head of the cusjust mentioned. The House may be expected to maintain its excellent new record for good work by passing these bills. Of the two it is difficult to say which is the more important. But it is likely that, if a question of precedence should arise, preference should be shown the Chestnut street bill, as a central driveway is almost a necessity. However, the record lately made by the House gives promise that improvement bills will be acted upon with dispatch and favorably.

### IMPRESSIVELY PLAIN.

There is an after-light which brings out facts in a simplicity of outline, resolving and dissipating all mystery; and it is this after-light which makes plain Mr. Roosevelt's negro policy, dispelling the haze of his sophistical explanations and showing forth his deliberate and unvarying discrimination in favor of negro candidates for Federal office.

In the retrospect Mr. Roosevelt's course of action s seen to be a straight, consistent expression of a powerful motive-to curry favor with a view to negro delegates and voters. Upon no other hypothesis is it explicable. The simple facts exclude every other; they tell their own story. As rehearsed by Representative Richardson the facts have irresistible, convincing force:

What I mean by President Roosevelt's conduct can be comprised in his urgent invitation to Booker Washington to take luncheon with him, and Washington's acceptance of the same; his extraordinary support of Doctor Crum for Collector of the Port of Charleston, after his own Republican committee and the Senate had turned the doctor down twice, norway standing which Mr. Roosevelt persisted in appointing him; also, his extraordinary exercise of power, unauthorized, as I believe it was, by the laws of the country. in wiping out the Post Office at Indian-

For the purpose of further illuminating the motive and of conclusively negativing Mr. Roosevelt's casuistic "door of hope" explanation the story of the Maryland negro A. S. Day should be added. The fear that Day's appointment to the Quondocquia Post Office would cost the administration many Republican votes in a close State prevented Day's admittance through the "door of hope," although Day was a first-class negro and had been indersed by the Congressman of his district.

With what a maze of sorcerous explanations were these actions shrouded at the several times they took place! And how luminous has the truth become with time!

"I believe," says Mr. Richardson, "that through the conduct of Mr. Roosevelt the negro question will become one of the features of the next campaign." One of the features surely, if not one of the issues.

Electricity. An Italian scientist claims to have established that electric tramways are great mediums in the disinfection of towns, says the Electrical Engineer, London. He points out that the electric spark which is so frequent an occurrence to the overhead trolley and the emission of light from the car wheel when the rail is used for the return current transform the oxygen of the air into ozone, which has a purifying and disinfecting influence. The high discharges, he says, are frequent enough to influence greatly the atmospheric constituents. especially where the line passes through narrow thoroughfares. They become antiseptic agents.
